

Win your ideal \$3,000 environmental prize*

Children's Drawing & Story Contest

Veolia Water Solutions & Technologies is organising a primary school student drawing & story contest for children aged 8 - 12 years to support their Water & Environment Student Booklet.

This contest is a simple and exciting opportunity for your school to increase environmental awareness amongst your community AND have the opportunity to win \$3,000 in environmental prizes.

Veolia Water Solutions & Technologies is part of Veolia Environnement, which has organised international environment awareness campaigns for primary school children for six years.

Throughout the learnings from the student booklets, your class can submit a joint project to win your school your own environmental prize. Each participating class will need to submit two collective drawings and a short story by July 2010 which will be judged by an official panel to win 1 of 3 prizes:

1st prize: receives \$3,000 towards their nominated ideal environmental prize*

2nd & 3rd prize: receives a Veolia Water experiment box.

** The environmental prize is nominated by the school and can include water tanks, worm farms, compost bins, vegetable gardens, books....*

To be part of this exciting program, class teachers need to return the enclosed reply form in order to receive, free of charge, dedicated teaching material, student booklets and further information about the contest. Please return the reply form by email, fax or mail as soon as possible but no later than Friday, 5th March 2010. Kits will be mailed as soon as your reply form has been received.

We look forward to working together with your students on this exciting project.

Veolia Environnement "Around The World" Previous Campaign Winners

Mrs. Hill, teacher at Baldivis Primary School, WA
Australian winner of the 2006 Sketches Around the World

"Winning the 2006 Veolia 'Sketches Around the World' competition has made a lasting impact upon all students in my class. After reading the research projects and dreams of the students from the other countries, the class now has a more global view of environmental issues.

2006 Australian winning drawing

They are concerned for the needs of young people who are experiencing problems of pollution and are actively seeking practical ways they can do to help. We are very grateful to Veolia Environnement in making this experience possible".

Mrs. Thetford, teacher at St Francis Catholic School, QLD
Australian winner of the 2008 Cities Around the World

Grade 4 - St Francis Catholic School, winners of the 2008 campaign with their student booklets

"Working through the 'Veolia Cities Around The World' campaign with my Grade 4 class was particularly beneficial as it allowed my students to see the impacts of Gladstone, an industrial city on the door step to the Great Barrier Reef, and of hundreds of cities who are adding to the world's pollution problem.

The information from the student booklets provided on cities from around the world widened the classes understanding of our need to act now to save the planet, which, as a teacher, was wonderful to witness the change of attitude in my students towards sustainable futures, being my overall intent".

Return the completed reply form by email, fax or mail or email your details to receive your kits as soon as possible but no later than Friday, 5th March 2010.
