

Service Engineer VIC

- **Global Company**
- **Dynamic team environment**
- **Diverse & interesting position**

Veolia Water Solutions & Technologies, a division of Veolia Water and Veolia Environment, is the world leader in water treatment, with 6,100 employees through 120 business units. We are the leader in engineering, design, project management and execution of projects for turnkey facilities and water treatment plants.

Present in Australia for over 70 years, we are the leader of Design and Build water and wastewater treatment plants. Our unique portfolio of differentiating technologies includes drinking water, industrial process water, and wastewater. We provide Design and Build capabilities, Engineered Systems, Equipment Supply, Leasing of Mobile Plants and Services, focusing on reuse and desalination. Our approach for delivering innovative water solutions makes us the partner of choice for municipal and industrial customers.

We are seeking a highly motivated and energetic Service Engineer to join our South Western Regional team based at Derrimut, VIC. You will be responsible for providing water testing and planned/ breakdown maintenance assist in the delivery of projects, retrofits and plant upgrades/ modifications, proactively support the sale of service labour and parts, and provide technical support to both our internal and external customers in a professional and courteous manner.

Some of the key duties include:

- To effectively satisfy the customer's needs for scheduled or planned maintenance, breakdown service and workshop repairs and chemical treatment, sampling and reporting.
- To apply technical training and knowledge on each job, follow procedures and maintenance schedules for the equipment.
- To prepare and submit a complete & correct "Service Order" for each visit of work carried out.
- To understand and use the intranet Database to prepare and submit QA paperwork to our customers and internally.
- To maintain technical knowledge on industry trends and on VWS products and services.
- To ensure that parts, materials and chemicals needed for work are coordinated in a timely manner.
- To make use of each site as an opportunity for sales of products and services, and forward such leads to the Service Manager.

The ideal candidate has experience in water filtration or specialty chemicals as well as formal Engineering qualifications (e.g. certificate in engineering and/or trade course – electrical, mechanical). You have basic understanding in process, technical and commercial aspects of the water treatment industry and a basic understanding of water treatment sales and service sector. Experience with PLCs, Allan Bradley or Siemens is highly regarded. An electrical background will also be desirable.

The ability to efficiently self time-manage and prioritise conflicting work objectives is essential. You have strong communication and strong computer skills in Microsoft Office. Regular travel to our regional clients in the Western districts will be required.

The successful candidate will be required to complete a pre-employment medical check.

At Veolia Water Solutions & Technologies we aim to recruit, develop and retain employees, and have built a unique culture and working environment based on our corporate values.

Please submit applications to careers@veoliawater.com.

We are an equal opportunity employer.
